01 Experience

Senior developer / analyst

MAR 2026 — PRESENT · 9 MONTHS

Mobile Smart City

SPAIN · REMOTE

Mobile Smart City is a leading US parking-management company, handling annual permits for parking zones, space reservations and other parking services.

I develop new web applications for parking management, as well as maintaining legacy projects, resolving incidents and carrying out migrations to more current web technologies.

C# · .NET · SQL · JavaScript · TypeScript · React

Full stack developer

FEB 2024 — JAN 2026 · 2 YEARS

Altia → Indra · Kids&Us

MADRID, SPAIN · REMOTE

An IT consultancy, two end clients.

Incident resolution as the main task, with a full-stack approach: the root cause could be the database, the application backend, an external service, the frontend, the environment configuration or, simply, a usage question from the user.

Full stack developer

FEB 2023 — FEB 2024 · 1 YEAR 1 MONTH

Exceltic → Ingeteam

MADRID, SPAIN · REMOTE

A group of companies specialising in electrical engineering, power electronics, automation and renewable energy, with an international presence across multiple industrial sectors.

Maintenance and evolution of the ERPs and web applications of the Ingeteam group: incident resolution, development of new features and migration of legacy projects to current technologies.

AGV programmer

AUG 2021 — DEC 2022 · 1 YEAR 5 MONTHS

Zemsania Global Group → ASTI Mobile Robotics

BURGOS, SPAIN

Design and programming of control systems for autonomous vehicles —forklifts, trailers, lifts, etc.— intended to transport materials, tooling and waste without human intervention across industrial manufacturing plants, optimizing logistics and production systems.

Functional analysis with the client, development of the automation solution, and on-site commissioning.

03 About me

My training has been entirely self-taught: despite having studied industrial engineering, I focused on software development and put serious time into courses and personal projects.

I try to give the attention they deserve to all the skills that have less to do with programming and software development, and more to do with being a good professional: what we call “soft skills”. The human side matters more and more, and it is not something you can get better at just by using AI.

CONTACT

Shall we talk?

I am always open to hearing interesting proposals.
